shafiqul.islam.sagor.developer@gmail.com
Contact: +8801793035257
Mymensingh , Bangladesh

Skill:

Expertise: HTML/CSS, React, Next.js, Astro.js, MongoDB, Tailwind CSS, Bootstrap
Comfortable: JavaScript, Express.js, ES6, Shadcn/ui, Ant Design, REST APIs, Redux, C, C++
Familiar: Node.js, Nest.js, TypeScript, Tanstack Query, Prisma, Socket.io

Experience:

Soft.Ai (Frontend Developer - Part-Time)

(15 September, 2025 - Present):

- Developed a full WhatsApp-style real-time chatting system with media, quick replies, and user panels.
- Built scalable, reusable UI components using React.js & Next.js with clean, optimized code.
- Integrated multiple APIs using Redux and delivered fast, polished UI features under tight deadlines.

Mahrity (Junior MERN Stack Developer - Full time)

(1 September, 2025 - Present):

- Built interactive quiz game features and dynamic user flows using Astro, React.js & Next.js.
- Developed reusable components and implemented API integrations using Redux Toolkit.
- Improved UI/UX across multiple modules, ensuring clean design, performance, and consistency.

Raintor (Junior Frontend Developer - Full time)

(1 January, 2025 - 18 June, 2025):

- Built scalable, reusable components with clean and efficient React.js & Next.js code.
- Integrated APIs using Redux across multiple real-world projects.
- Strong UI design skills with the ability to deliver results quickly.

TechnoGenix Solutions (Frontend Developer - Internship)

(25 July, 2024 - 10 November, 2024):

- Learned to code with TypeScript and Next.js.
- Created reusable components and wrote clean code.

- Integrated APIs with Redux across multiple projects.

Projects:

Click To Food || (Ecommerce Website- company) || [Live Site Link](#)

Technologies: Next Js , React , Tailwind , Antd

- Contributed to the design and development of 10 panels for the "Click to Food" website, including both new UI designs and redesigns of existing components.
- Took full ownership of approximately 70% of the overall design work, ensuring consistency, responsiveness, and user-friendly interfaces across all pages.
- Actively fixed functionality and UI issues, improving website performance and user experience.

QuizBox|| (Quizze Website) || [Live Site Link](#)

Technologies: React , Astro , Tailwind

- This is a quiz-tournament based platform where users must **log in to join challenges** and compete in live games.
- The UI includes dynamic stats, leaderboard access, and interactive gameplay sections designed for smooth participation.
- The full layout is **fully responsive**, ensuring users can play and navigate effortlessly across all devices.

MS Medicine|| (Mern stack website) || [Live Site Link](#) || [Client Site Link](#) || [Server Site Link](#)

Technologies: ReactJs, NodeJs, ExpressJs, MongoDB, Firebase, Stripe, JWT, ContextAPI, Tailwind

CSS, React Query

- A responsive MERN Stack Base medicine MarketPlace website
- User has 3 roles (Admin, Seller, Customer). You can see the dynamic dashboard of your own role in the dashboard
- User can login this side, and same page protected by private route

Language:

Bangla - Native | **English** - basic
